2022 National Nursing Workforce Survey

Richard A. Smiley, MS, MA
Senior Statistician | Research
NCSBN

2024 SCIENTIFIC SYMPOSIUM

Outline

1. Background & Introduction
2. Methods
3. Response Rate
4. Results
 - Registered Nurses
 - Licensed Practical/Vocational Nurses
5. A Quick Look at The Future
6. Key Take Aways

Background & Introduction

- Collaborative partnership with The National Forum of State Nursing Workforce Centers
- Data collection from HRSA's National Survey Sample of Registered Nurses stopped after 2008
- NCSBN stepped up to fill the void of RN supply data in 2013, 2015, 2017, and 2020

Methods

- **Mailout Survey Sample (43 Jurisdictions)**
 - All active RN & LPN licensees eligible
 - Sampling was stratified by state
 - **154,757** RNs & **154,490** LPNs selected
- **Email Survey Sample (4 Jurisdictions)**
 - All active RN & LPN licensees eligible
 - Sampling was stratified by state
 - **26,697** RNs & **18,710** LPNs selected

- **e-Notify Data (5 Jurisdictions)**
 - A comprehensive review of data collected through the e-Notify system
 - Five jurisdictions had data of sufficient quality to use for survey
- **Materials**
 - Minimum Data Set used for bulk of questions
 - Questions added for telehealth, NLC, retirement, travel nursing, direct care
 - 2022 Survey added COVID questions

Weighting

- Nonresponse bias analysis conducted
- Survey responses weighted based on:
 - Age (nonresponse weight)
 - Gender (nonresponse weight)
 - State nursing population size (stratification weight)

Descriptive Analysis

- Counts, and Mean/Median Values

Response

Mailout Survey

- **26,757** RNs responded - **17.8%** response rate
- **22,634** LPNs responded - **15.2%** response rate

Email Survey

- **2,458** RNs responded - **9.2%** response rate
- **2,176** LPNs responded - **11.6%** response rate

E-Notify Data

- **249,416** RNs records
- **30,693** LPNs records

A woman with dark hair, wearing light blue scrubs, is shown in profile, looking out a window. The background is a bright, slightly blurred view of a city or town. The text "Registered Nurse Results" is overlaid on the left side of the image.

Registered Nurse Results

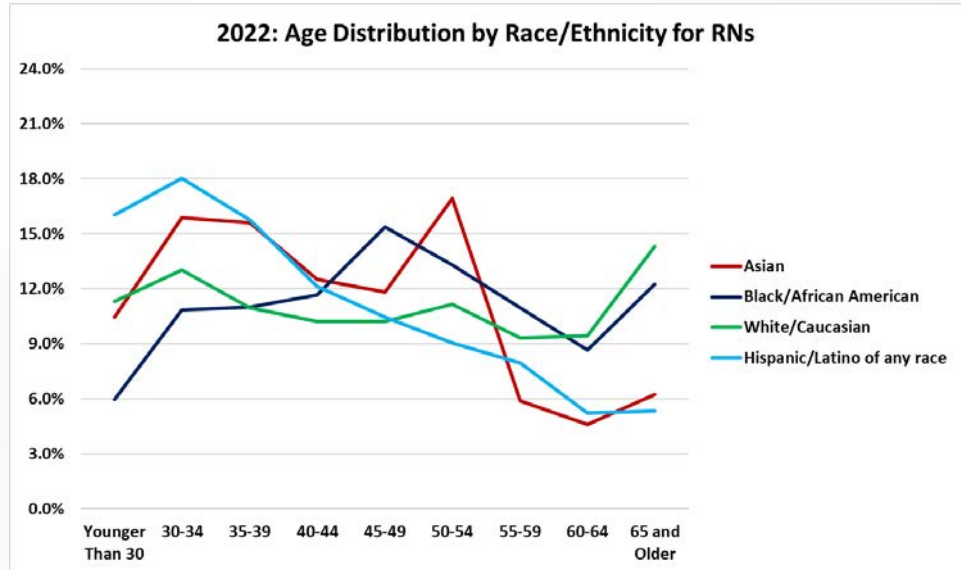

- Median Age = 46
 - **a decrease of 6 years** from the 2020 median
- Almost a quarter of RNs are age 34 or younger
- Over 200,000 experienced RNs lost to workforce

- Men **11.2%**
- Race/Ethnicity Groups with the highest percent males are
 - Asian (**17.7%**)
 - Native Hawaiian or Other Pacific Islander (**15.5%**)

- Individuals from racial and ethnic minority groups accounted for **40.7%** of the US population in 2021
- **24.0%** of RNs were minorities in 2022
 - up from **23.0%** in 2020

47.2% held a baccalaureate as their **initial** nursing education

71.7% had baccalaureate or higher degree as their **highest level** of nursing education

- **88.9%** of RN licensees were actively employed in nursing
 - an increase from **84.1%** in 2020
- **70.2%** of RN licensees were working full-time
 - up from **64.9%** in 2020

Median pre-tax annual earnings by responding RNs increased from **\$70,000** in 2020 to **\$80,000** in 2022

50.1% of RNs indicated they engage in telehealth

- similar number to the previous rates

Of those RNs providing nursing services remotely, proportions reporting providing services over state and national borders remained constant in comparison to previous years

- Usage by RNs of video calls tripled from **11.0%** in 2020 to **35.4%** in 2022
- Usage of electronic messaging increased from **24.5%** in 2020 to **32.7%** in 2022

Among RNs who hold a multi-state license, **8.9%** have used it for telehealth while **67.8%** have not

As a result of the pandemic:

- 61.8%** of RNs reported a workload increase
- 15.6%** reported that they changed their practice setting
- 8.7%** reported that they retired or left nursing
- 46.2%** reported that they felt burned out at least a few times a week

Licensed Practical/ Vocational Nurse Results

- Median Age = 47
 - **a decrease of 6 years** from the 2020 median
- There was a loss to the experienced workforce of over **60,000** LPN/VNs

- Men **10.2%**
 - up from **8.1%** in 2020
- Race/Ethnicity Groups with the highest percent males:
 - Native Hawaiian or Other Pacific Islander (**29.5%**)
 - Asian (**24.2%**)

- Individuals from racial and ethnic minority groups accounted for **40.7%** of the US population in 2021
- **39.7%** of LPN/VNs were minorities in 2022
 - up from **35.9%** in 2020

Highest Level of education:

- **71.8%** vocational/practical certificate-nursing
- **13.1%** associate's degree-nursing
- **2.9%** baccalaureate degree-nursing
- **12.2%** diploma

71.0% of responding LPN/VNs reported being actively employed in nursing full-time

- An increase from **65.7%** in 2020

Median pre-tax annual earnings by responding LPN/VNs increased from **\$44,000** in 2020 to **\$50,000** in 2022

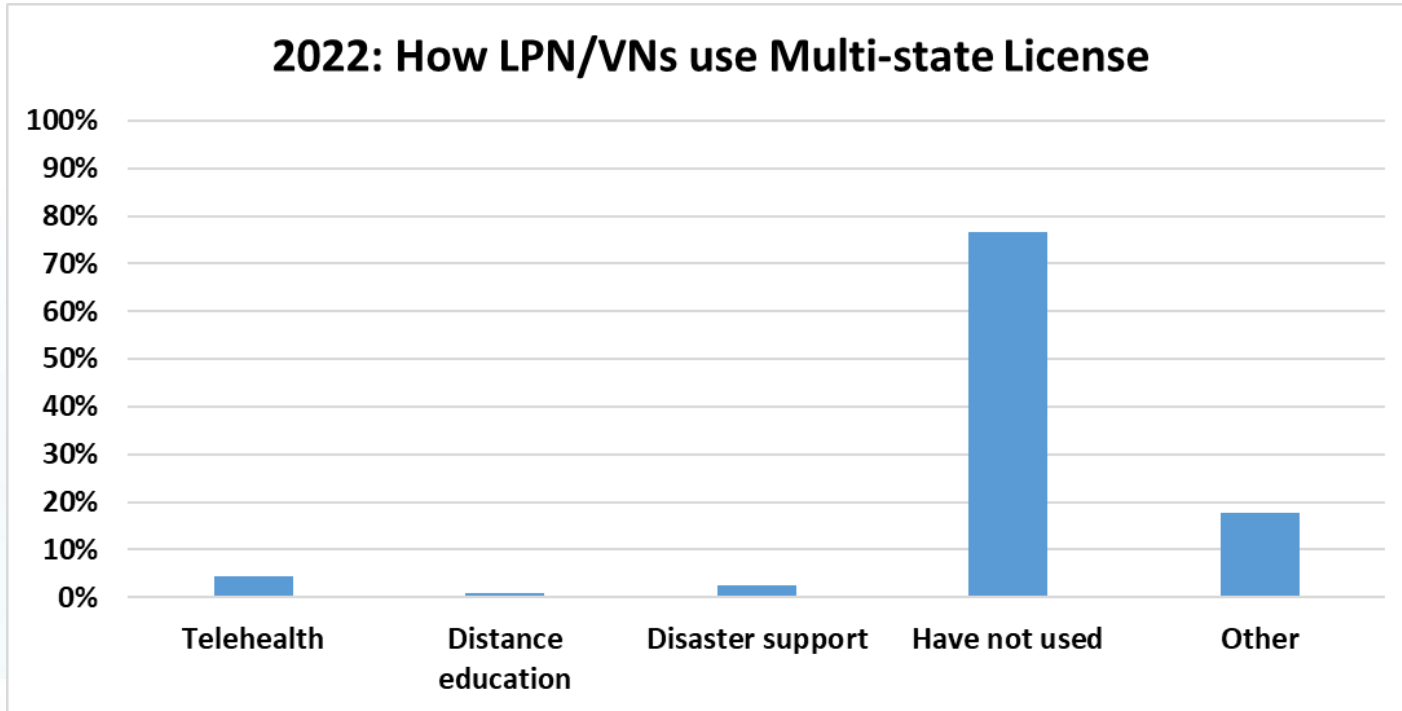

55.5% of LPN/VNs indicated they engage in telehealth

- An increase from **50.1%** in 2020

Usage by LPN/VNs of Video calls increased from **11.3%** in 2020 to **30.9%** in 2022

Among LPN/VNs who hold a multi-state license, **4.4%** have used it for telehealth while **76.6%** have not

COVID-19 Impact

- **62.9%** of LPN/VNs reported that their workload increased as a result of the pandemic
- **11.4%** reported that they changed their practice setting as a result of the pandemic
- **9.9%** reported that they retired or left nursing as a result of the pandemic
- **44.8%** reported that they felt burned out at least a few times a week as a result of the pandemic

Future Impact

Nurses' Intent to Leave by 2027

- **800,000** RNs and **184,000** LPNs/LVNs
- Equivalent to **20%** of the total licensed U.S. nursing workforce
- **24%** of RNs are younger, early career nurses

Key Takeaways

- In the wake of the COVID-19 pandemic, the nursing workforce has undergone a dramatic shift with the loss of hundreds of thousands of experienced RNs and LPNs
- The workforce today is distinctly younger, more educated, and slightly more diverse
- Salaries have increased for RNs & LPN/VNs
- About half of RNs and LPN/VNs engage in telehealth
- One fifth of the total licensed U.S. nursing workforce may leave nursing in the next five years.
