Presenter

NCSBN Nursing Regulation

In regulation, knowledge is power. But to truly lead, you need more than just knowledge.

ICRS is your key to advancement, where learning, networking and leadership converge.

The ICRS Certificate program lets you network with your colleagues from around the world who share your passion for regulatory excellence.

Learn at your own pace with courses designed to fit busy schedules.

If you want to do ICRS and you think it's going to take too much time, jump off that ship and do it because the information that you will gain through that experience is so valuable that when you complete the program, you're going to want to continue taking the courses.

My suggestion would be to look at the offerings. They're fascinating and they're varied. And I'm sure there's something that you can find that you'll be able to utilize in the roles. All of the roles that you are experiencing right now.

ICRS courses really gave me that bit of knowledge, confidence and networking to be able to move forward in my career.

Lead with confidence and influence the future of regulation.

Enroll in the ICRS Certificate Program today because when you learn, network and lead, you redefine what's possible.
