Nursys® Licensure QuickConfirm - Video Transcript

©2012 National Council of State Boards of Nursing, Inc.

More info: nursys.com

Licensure QuickConfirm is a free service that allows employers and the public to quickly search for a nurses license and affirmed licensure and disciplined information. Let's learn just how quick this confirmation is.

Licensure Quick Confirm utilizes the data found within NCSBN's Nursys application which is the only national database for verification of nurse licensure, discipline and practice privileges for RNs and LPNs. It is comprised of data obtained directly from the licensure systems of US boards of nursing and it's territories through frequent, secured updates.

Licensure QuickConfirm is simple to use. With just a few details about a nurse, you'll get the documentation you need in a snap. The site allows you to search for a nurse in a couple of different ways. Search by name, license type and state for a list of matching results. Or search by license number, licenses type and State to get more accurate results. Locate and select the appropriate license from the search results and view the report.

The report summary page includes details such as: licensing state, license type, licensee name, license number, compact status, if the license is active, original issue date of license, license expiration date, and if there is discipline against the license or against privilege to practice. You can print or download the report in PDF format with or without supporting discipline documents. Conveniently access licensure and disciplined information when you need it for free.

Nursys Licensure Quick Confirm is available 24 hours a day, seven days a week. To get started, visit nursys.com.
